

Marc J. Greenberg

Boca Raton, FL 516 – 313 - 4826 marc.greenberg@codemarc.net

<https://codemarc.net> <https://www.linkedin.com/in/codemarc>

Chief Software Architect / Chief of Staff / Vice President of Software Development

As an Enterprise Architect and Leader

- Recognized for consistently delivering on agility for effective processes, systems, and infrastructure
- Experienced directing architects, analysts, and technologists in defining and achieving objectives
- Focused on the integration of Business Intelligence and Service Architectures
- Restructuring processes and systems producing efficient / effective delivery of business functionality
- Experienced managing locally distributed and outsourced cross-functional teams (82 reports)

Professional Experience

Codemarc Consulting, LLC. Delray Beach, FL Jan 2021 - Present

Principal Consultant

Architectural Development - During early ideation, architectural support at the tactical (as a generalist) and strategic (visionary) level. We explain the big picture in mind sized chunks.

- Deep and difficult integration projects. Support for long data analytics journeys, data integration, integrity, governance, quality, ownership, CEP, privacy, etc. including expertise in integration and business intelligence
- Definition and guidance for lift and shift projects. Methodology to break up "the monolith", to containerize, to refactor as microservices and run at scale. Help with modernization efforts and journey to the clouds, infrastructure, provisioning, runtime, orchestration, application, observability, and analysis.
 - Achieved 30% cost reduction by modernizing legacy systems with microservices.
 - -Enhanced data governance across client environments, improving data integrity by 20%.
 - Executed cloud migration strategies, increasing system uptime by 25% and reducing infrastructure costs by 20%.

Additional work in custom reporting software solutions for point-of-sale system integrations. Cloud based backend development and evolving architectures. Public Clouds AWS, Azure, GCP and Digital Ocean.

Integration / Cloud / Architect / Passionate Articulate Evangelist, Strategic Planning (People, Technology, Business, Partnering) Language/Platform agnostic Polyglot, ai copiloted, Container focused, devops minded (CI/CD automation) UI/UX/Web Fullstack developer (react, node, material), Hands On - Hands In

Intelligent Audit Remote, NJ Feb 2023 – April 2024

Chief of Staff (Office of the CTO)

Freight Auditing, Freight Payment, Small Parcel Audit, Supply Chain Solutions, Analytics & Data Information, Supply Chain Consulting, Parcel Audit, Parcel Management, Logistics, Machine Learning, and Business Intelligence

- Focusing on outcomes, directed strategic architectural initiatives, driving the company towards innovative and scalable technology solutions that enhanced operational efficiency and future readiness.
- Led process improvement efforts, implementing best practices that streamlined workflows, improved developer experience, and boosted productivity across the technology department.
- Championed a culture of excellence in developer experience, advocating for and implementing tools and practices that facilitated a more engaging and efficient development environment.
- Directed the adoption of modern architecture principles, leveraging cutting-edge technologies and methodologies to enhance data agility, integrity, and analysis, supporting data-driven decision-making.
- Ran the AWS Map Access program to defined the move to the hybrid cloud environment.

- Leadership team implementing entrepreneurial operation system (eos), developing values, 3-5 strategic plan.

docker, k8s, rancher, react, node.js, bash, api development, microservices, observability, Postgres, php, Datadog, Atlassian, chrome extensions, workflow, devops

Par Technology Corp. Remote, NY Mar 2022 – Dec 2022 Chief of Staff (Office of the CTO)

PAR is a leading global provider of software, systems, and service solutions to the restaurant and retail industries.

Establish Governance - Establish guardrails around technology selection and architectural designs with an emphasis on developer empowerment, Ensure that cost constraints are factored in, limit AWS cost sprawl, Build and administer processes for exceptions and accepting new technologies.

Act as the CTO of new projects - Own key architectural decisions, drive non-functional requirements in conjunction with product requirements, vendor evaluation and selection, feasibility evaluations, early prototypes, proof of concepts. Set up the team and project up for success.

Plan for the Future - What will we need to build next quarter, next year, and what design work do we need to do ahead of that. Designed the 2025 Unified Commerce NorthStar.

Work on Engineering Culture - Provide mentorship to junior and developing team members, participate in architecture-related Communities of Practices and Working Groups. Define role and requirement for team-based architects.

BuildingLink.com, LLC. Remote, NY Sept 2016 – Dec 2021 Consultant / Developer / Architect

BuildingLink provides an innovative web-based/connected platform for efficient management, flawless communication, and enhanced living experience for luxury residential properties.

As the only “big picture” architect, driving the conversation on resilient code, developer experience, platform vs microservices, and flawless deployment. Developed the tactical/strategic architectural roadmap to define/promote best practices for modernization, K8s, K3s, Rancher, Rancher Desktop, Microservices, Kafka and correct implementation of public cloud use cases and a process to bind them all.

Conversion Architecture Team: Providing technical architectural leadership on a project to convert the entire 20,000+ page web forms base site to a modern reactive Vue.JS based implementation

First Technical Phone Screener: Hiring developers to round out the data team (Microsoft ecosystem, EF, SQL server, .net, identity server, rabbit mq) and for Front-end JavaScript developers, Vue.js conversion project.

DataLink * A BuildingLink Analytics Platform: Envision, ideation, prototype and implementation of an advanced data platform designed to develop user driven business intelligence for the CEO, including visual discovery of metrics and patterns. Provide a platform for internal business users to enable rapid data analysis over 15 years’ worth of unique resident/building data. Content publishing as embedded reports for customer’s use with interactive access.

Design/Implement on Microsoft Power BI and SSAS (connector, cube, etl, embed, and secure data integration). Design/Integrate/Implement Qlik Sense data analytics platform (apps, mashups, custom visuals)

Microsoft Power BI, SQL, SQLSSAS, Qlik Sense Enterprise, k8s, docker, vue.js, node, C#, VB and web, Message queuing, workflow design, automation for html-based email emissions.

“Alexa, ask BuildingLink”: Ongoing development of voice user interfaces (VUI) that integrated/connects residents, management and/or staff with real-time information, provided by BuildingLink (platform, API, and Aware ‘a sensor solution’). Alexa Skills and Amazon Voice Services.

Public Cloud (AWS), Lambda, Node.js, mongodb

Smash Data, Inc. New York, NY May 2016 – May 2019

Co-Founder / Chief Technical Officer

Tasty Analytics for your Eatery (<http://smashedata.com>)

Enterprise quality tools to help restaurant owners manage their locations and understand their sales in real-time. Discovered the need for real-time actionable business intelligence in the restaurant industry. Defined compelling use cases around the revenue generation and cost containment/reduction.

Architected, designed, and implemented cloud based Smash Data Integration Platform (api, pos data ingestion components, and rules engine).

Implemented Smashboard (MVP) node/java/rest cloud hosted, containerized, micro service-based app that delivers near real-time analysis POS-to-Pocket content, through the Smash Data platform. Fully functional docker/container-based reference architecture is performing well.

Public Cloud (digital ocean), Docker, POS, Java, Node.js, nginx, haproxy, sql, JavaScript / Typescript, CI/CD, Linux, Windows

iWay Software New York, NY. Sep 2001 – Nov 2015

Chief Software Architect

Designed and implemented the full platform strategy for all integration products. These products have generated millions of revenue dollars. Responsible for the overall architecture of all iWay Software product offerings. Designed and implemented the company's Cloud, Web Services and Adapter strategies as well as product offerings.

Cloud native conversions and architecture for the enterprise product portfolio.

Data integration products focused on big data, data quality, data governance, and data wrangling

iWay Sentinel, an alm tool to monitor and manage enterprise application assets

iWay Enable, complex event processing, real-time, non-invasive visibility into automated business processes.

Architected / Implemented iWay Service Manager, a flagship product defined for the Data Integration ESB space.

Docker, k8s, Java, JavaScript, d3.js, Bootstrap3, bash, Restx, API development, neo4j, graph database, titan/Cassandra, maven wso2is, postgres, iway service manager, iway data quality, iway master data Management, webfocus, jira, Jenkins, node.js, c/c++

Information Builders, Inc New York, NY Sep 1989 – Jun 2001

VP Development

Relationship owner. Microsoft Certified Solution Provider Program (MCSP.) EDA (Client/Server Enterprise Data Access) and its API. Designed a protocol independent communications API, used in IBI products to transport data between all client/server platforms. Managed a staff of **82 developers**

IBM | Glendale Labs, Endicott, NY May 1987 - Aug 1989

Technical Manager

Supervised **14 programmers**, to design / implement a system independent REXXSAA Language definition level 4.00 interpreter engine, as well as an OS/2 specific code harness. The system independent code was written entirely in 'C'. The system dependent was written in both 'C' and assembler. Project completion date was the release of OS/2 1.2. Participated in the design and implementation of the REXX language for the AS/400 system.

Education

Syracuse University, School of Computer Information Science Bachelor of Science

Patents

Inventor of Record, US Patent no. 20050149941: Framework for adapter used in enterprise application integration.
